

Connecting Australia's healthcare system

Today's greatest challenge is cost effective healthcare. However the sector is experiencing extraordinary pressure with simultaneous demands to cut costs and improve services.

Healthcare providers are inundated by information about resources, equipment and patients all located across disparate systems. Existing IT networks are not designed to securely stream big data or deliver real-time information. This reduces valuable clinician to patient face-time.

Visionstream works with healthcare providers to improve system integration and ultimately improve patient outcomes.

Moving toward Intelligent Hospital status

Cisco awarded Visionstream the site survey and design for the Canberra Hospital Wireless Coverage located in Yamba Drive, Garran ACT.

The project provided an onsite wireless design survey of the entire hospital for the purposes of providing VoIP Telephony, Location Services and Radio Frequency Identification (RFID).

The key project delivered a design which would provide the Hospital with these services, including broadband services, throughout the hospital campus. This project enabled Canberra Hospital to move towards an Intelligent Hospital status, by providing a minimum of three access points within the areas that were to receive the technology update.

Leading the industry

With more than two decades of industry experience, Visionstream has designed and completed some of the country's largest communications networks

Project highlights

- Canberra Hospital now has VoIP Telephone, location services and RFID including Broadband throughout the campus.
- With a minimum of three access points in areas that were to receive a technology update, Canberra Hospital now has the ability to move toward an Intelligent Hospital status.

We partner with you to deliver value, driving network efficiency and providing end-to-end solutions from design to build, integration and ongoing maintenance of the asset.

across a wide range of fixed and wireless technologies.

Our end-to-end project commitment to you is backed by industry leading project performance, robust project management, in-house technical capabilities and 24/7 real-time support. We also work seamlessly with our extensive sub-contractor network and a wide range of technology vendors and carriers to ensure we deliver the best solution for you.

The breadth of our services and our ability to scale means we can provide any organisation a complete turn-key approach to ICT services, reducing whole-of-life project costs.
