

## Connecting Australia

As reliance on technology expands exponentially, the demand for reliable, available and robust networks across retail, residential, corporate and government sectors can only increase.

Visionstream works with carriers and vendors to provide innovative, effective and efficient solutions to ensure the supply of available networks meet voice and data demand through optimising networks, efficient build and roll out and ongoing maintenance of these critical assets.

## Fast broadband for rural and regional communities

Visionstream designed and constructed the 1,800km Reef Network that stretches from Brisbane to Cairns, enabling fast broadband to northern and regional Queensland.

As part of this project, Visionstream also undertook the design, construction and maintenance of all the laterals built to access the network.

The Reef Network was, at the time, Australia's first privately owned optic fibre network and provides telecommunication facilities to Queensland's regional centres along the coast. The ongoing operations and maintenance continues with Optus as the owner of this asset.

Visionstream also performs ongoing operations and maintenance repair services and proactive and reactive cable maintenance.

## An experienced partner

With more than two decades of industry experience, Visionstream has designed and completed some of the country's largest communications networks across a wide range of fixed and wireless technologies.

## Project highlights

- The first network providing fast broadband to regional centers along Queensland's coast, from Brisbane to Cairns
- Visionstream's delivery response ensured Optus was the first carrier to have its services restored post cyclone devastation from Yasi, Oswald, Marcia, Larry and Hamish
- Visionstream's longest running project
- Complete turn-key field operations and management providing 24/7 response and break/fix service
- Fulfillment of client obligations to Queensland Rail ensuring client compliance to licensor conditions through to 2029

We partner with you to deliver value, driving network efficiency and providing end-to-end solutions from design to build, integration and ongoing maintenance of the asset.

Our end-to-end project commitment to you is backed by industry leading project performance, robust project management, in-house technical capabilities and 24/7 real-time support. We also work seamlessly with our extensive sub-contractor network and a wide range of technology vendors and carriers to ensure we deliver the best solution for you.

The breadth of our services and our ability to scale means we can provide any organisation a complete turn-key approach to ICT services, reducing whole-of-life project costs.

## A safe pair of hands

We are dedicated to the safety of our people, project partners and the communities in which we work. We have an excellent reputation and a strong record of safety and environmental performance.

Our safety, environment and quality management systems are externally accredited and our safety conscious culture encourages innovation in the field to further eliminate or minimise risks associated with the work performed.

Through strong leadership and individual commitment, we will continue to deliver projects without harm to people or the environment.
